Digital Fashion Project

Collaborative Online International Learning in Digital Fashion

Launch of 1st project result - New Methodology On A Common Ground On Collaborative Online International Learning In The Field Of Digital Fashion

The first project result is already widely disseminated through the social networks of the project and the partnership.

Through a methodology that has combined desk and field research, it was possible to assess the level of key digital fashion skills, industrial application and needs, and to develop a methodology for collaborative international online digital fashion learning in the five project partner's countries: Romania, Portugal, Slovenia, Belgium and France.

The analyses of the survey and the interviews with 35 companies show that the use of virtual fashion technologies in the clothing development process and for the presentation of clothing on the fashion market is still a rather young and new branch for the European companies. Most of the interviewed companies use different types of software in the garment development and production process. However, it was found that there is still a gap between current and needed digital skills for companies to get closer to their goal, which is a high level of knowledge and digital skills for fashion design.

The basis of the work for the activities that are currently in progress has been built, particularly at the level of teaching methods and the creation of teaching materials according to the recommendations for online learning, particularly for people with visual, hearing and mobility impairments.

Collaborative Online International Learning in Digital Fashion

Technical meetings on going

Transnational project meetings have been an excellent mechanism for communication and strengthening teamwork. With a constantly updated work plan and a fluid involvement of the partnership in the different dynamics, the project has progressed at a smooth rhythm.

Hogent and ENSAIT were the partners that hosted the second and third technical meetings of the project, respectively.

Citeve, located in Vila Nova de Famalicão, Portugal, will be the next partner to host the 4th meeting of the project which is scheduled for June.

DigitalFashion platform structure

What's next in the Digital Fashion project?

The second, third and fourth project outcomes go hand in hand to ensure that all objectives are achieved.

During the year 2023 the partnership will be dedicated to the completion of the Library of knowledge for virtual fashion design and technology, sustainment and implementation of the customised training platform of fashion design by personalized 3D virtual garment fitting, for students, teachers and professionals and will start elaborating the training programme of fashion design and technology that will include general theories, basic concepts, design examples and exercises.

Follow our activities through our social networks.
